### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Michael Makuch on 06/16/10.

The application has been amended as follows:

9. (CURRENTLY AMENDED) A substrate cleaning method for cleaning a substrate by bringing a brush into contact with the substrate while rotating the same, and by spraying liquid droplets from a two-fluid nozzle onto the substrate, wherein

the brush and the two-fluid nozzle are moved radially outward relative to a center of the substrate, while a cleaning position of the two-fluid nozzle is kept nearer to the center of the substrate than a cleaning position of the brush,

the cleaning position of the brush and the cleaning position of the two-fluid nozzle are moved in directions opposite to each other,

the cleaning position of the two-fluid nozzle is moved radially outward to a periphery of the substrate relative to the center of the substrate to areas where the brush has been in contact with the substrate,

a moving speed of the cleaning position of the two-fluid nozzle relative to the substrate is higher than a moving speed of the cleaning position of the brush relative to the substrate, and

a difference between a distance from the center of the substrate to the cleaning position of the brush and a distance from the center of the substrate to the cleaning position of the two-fluid nozzle becomes gradually smaller, as the cleaning position of the brush approaches the periphery of the substrate.

Claim 13: line 3, before "moving" (both occurrences), delete "a" and insert —the—

15. (CURRENTLY AMENDED) A medium for recording a program that allows a computer to execute the procedures of bringing a brush into contact with a substrate

Art Unit: 1711

while rotating the same, and spraying liquid droplets from a two-fluid nozzle onto the substrate, wherein

the brush and the two-fluid nozzle are moved radially outward relative to a center of the substrate, while a cleaning position of the two-fluid nozzle is kept nearer to the center of the substrate than a cleaning position of the brush,

the cleaning position of the brush and the cleaning position of the two-fluid nozzle are moved in directions opposite to each other,

the cleaning position of the two-fluid nozzle is moved radially outward to a periphery of the substrate relative to the center of the substrate to areas where the brush has been in contact with the substrate,

a moving speed of the cleaning position of the two-fluid nozzle relative to the substrate is higher than a moving speed of the cleaning position of the brush relative to the substrate, and

a difference between a distance from the center of the substrate to the cleaning position of the brush and a distance from the center of the substrate to the cleaning position of the two-fluid nozzle becomes gradually smaller, as the cleaning position of the brush approaches the periphery of the substrate.

Claim 16: line 5, delete "the same position"

Claim 19: lines 2 and 3, before "moving" delete "a" and insert —the—

2. The following is an examiner's statement of reasons for allowance: The prior art fails to teach or suggest a method for cleaning a substrate by bringing a brush and a two-fluid nozzle into contact with the substrate wherein the brush and the two-fluid nozzle are moved radially outward relative to a center of the substrate, while a cleaning position of the two-fluid nozzle is kept nearer to the center of the substrate than a cleaning position of the brush, a moving speed of the cleaning position of the two-fluid nozzle relative to the substrate is higher than a moving speed of the cleaning position of the brush relative to the substrate, and a difference between a distance from the center of the substrate to the cleaning position of the brush and a distance from the center of

Art Unit: 1711

the substrate to the cleaning position of the two-fluid nozzle becomes gradually smaller, as the cleaning position of the brush approaches the periphery of the substrate.

3. In several interviews with Mr. Michael Makush on 6/10/10 and 6/16/10, the examiner discussed amending claims 9 and 15 to incorporate the limitations of claim 14. The examiner further discussed amending the claims to correct 112, second paragraph issues.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sharidan Carrillo whose telephone number is 571-272-1297. The examiner can normally be reached on M-W, F 6:30-5:00pm, alternating Thursday.
